Safety Data Sheet: CAZUELA™ Liquid Dish Soap

Prepared to OSHA Hazard Communication Standard (29 CFR 1910.1200), GHS format · November 4, 2026

Section 1. Identification

Product name	CAZUELA™ Liquid Dish Soap (Lavatrastes líquido)
Varieties covered	ORIGINAL (BJS-DSA-5G). All share one base formula; they differ only in fragrance and colorant.
Recommended use	Household hand dishwashing liquid. Not for automatic dishwashers.
Restrictions	Use only as directed on the label. Not a disinfectant. Do not mix with other chemicals.
US importer / distributor	Baranta International Trade Solutions LLC, 919 S Imperial Avenue, Calexico, CA 92231, USA · 1-800-670-5003 · baja.supply
Emergency phone	Poison Help 1-800-222-1222 (24 h, medical) · 1-800-670-5003 (business hours)

Section 2. Hazard(s) identification

Classification	Serious eye damage/eye irritation, Category 1
Pictogram	 Corrosion (GHS05)
Signal word	**Danger**
Hazard statement	H318: Causes serious eye damage.
Precautionary statements	P264 Wash hands thoroughly after handling. P280 Wear eye protection. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310 Immediately call a POISON CENTER (Poison Help 1-800-222-1222) or doctor. P102 Keep out of reach of children.
Other hazards	Swallowing may cause irritation of the mouth, throat and stomach, nausea and vomiting. Contains fragrance allergens, and may contain isothiazolinone preservatives, that may cause an allergic skin reaction in sensitive people. Contains formaldehyde at about 0.04 %, below the 0.1 % classification limit (see Sections 11 and 15).

Section 3. Composition / information on ingredients

Mixture. Concentrations are ranges in % by weight.

Ingredient	CAS	% (w/w)
Water	7732-18-5	Balance
Sodium laureth sulfate	68891-38-3	3–5
Sodium dodecylbenzenesulfonate (dodecylbenzenesulfonic acid neutralized with sodium hydroxide)	25155-30-0	1–2
Sodium chloride	7647-14-5	1–5
Fragrance (proprietary mixture)	Proprietary	0.5–1.5
Cocamine oxide	61788-90-7	< 0.5
Cocamidopropyl betaine	61789-40-0	< 0.5
Tetrasodium EDTA	64-02-8	< 1
Colorant (green)	Proprietary	< 0.5

Ingredient	CAS	% (w/w)
Formaldehyde	50-00-0	≈ 0.04 (below 0.1)
Sodium benzoate (may be present, from raw materials)	532-32-1	< 0.1
Methylchloroisothiazolinone (may be present, from raw materials)	26172-55-4	< 0.01
Methylisothiazolinone (may be present, from raw materials)	2682-20-4	< 0.01

Section 4. First-aid measures

Eyes	Rinse immediately with water for at least 15 minutes, holding eyelids open; remove contact lenses. Get medical attention right away (Poison Help 1-800-222-1222).
Skin	Rinse with water. If irritation or rash occurs, get medical advice.
Ingestion	Rinse mouth and drink a glass of water. Do not induce vomiting. Call Poison Help 1-800-222-1222 or a doctor.
Inhalation	Not expected to be a route of exposure. Move to fresh air if discomfort occurs.
Most important symptoms	Eye pain, redness and tearing; risk of serious eye damage. Mouth and stomach irritation if swallowed.

Section 5. Fire-fighting measures

Not flammable. Use extinguishing media suited to the surrounding fire (water spray, foam, carbon dioxide, dry chemical). Hazardous combustion products: Carbon oxides, sulfur oxides, nitrogen oxides, sodium oxides. Firefighters should wear self-contained breathing apparatus and full protective gear.

Section 6. Accidental release measures

Spills make floors slippery. Wear eye protection. Contain large spills and absorb with inert material (sand, earth, absorbent pads); place in containers for disposal. Rinse small spills and residues with plenty of water. Prevent large quantities from entering storm drains or waterways.

Section 7. Handling and storage

Handling: Avoid contact with eyes. Do not swallow. Keep lid closed; store upright, away from direct sun. Do not mix with other chemicals.
Storage: keep the pail closed and upright in a cool, dry place, away from direct sunlight and heat. Keep out of reach of children. Up to 12 months in the closed original pail under the storage conditions below.

Section 8. Exposure controls / personal protection

Exposure limits	Formaldehyde: OSHA PEL 0.75 ppm TWA, 2 ppm STEL. Present at about 0.04 % as a preservative; airborne exposure is not expected in normal use. No other component has an OSHA PEL or ACGIH TLV.
Engineering controls	General ventilation is adequate.
Eye protection	Chemical splash goggles or safety glasses with side shields when pouring or handling bulk containers.
Skin protection	Rubber or nitrile gloves for prolonged contact or bulk handling.
Respiratory	Not required in normal use.

Section 9. Physical and chemical properties

Appearance	Liquid; color varies by variety (see product data sheet)
Odor	Fragranced; varies by variety
pH (as supplied)	6.5–8.5

Relative density	1.000–1.020 g/mL
Solubility in water	Soluble / miscible
Flammability	Not flammable
Other properties	Odor threshold, melting/freezing point, boiling point, evaporation rate, vapor pressure, vapor density, partition coefficient, auto-ignition and decomposition temperature, viscosity: not determined.

Section 10. Stability and reactivity

Stable under normal conditions of storage and use. No hazardous polymerization. Avoid strong oxidizers, strong acids and mixing with other chemicals. Avoid prolonged heat and direct sunlight. No hazardous decomposition products under normal use; see Section 5 for combustion products.

Section 11. Toxicological information

Routes of exposure	Eyes, skin, ingestion.
Acute toxicity	No data on the mixture. Based on its components and their levels, the mixture is not expected to meet the criteria for acute toxicity classification. Swallowing larger amounts may cause gastrointestinal irritation.
Eye	Causes serious eye damage (classified on composition).
Skin	May cause mild irritation with prolonged contact. Fragrance allergens and isothiazolinones (if present) may cause sensitization in sensitive people.
Carcinogenicity	Formaldehyde (CAS 50-00-0, about 0.04 %): IARC Group 1, NTP Known Human Carcinogen, OSHA regulated; present below the 0.1 % classification limit.

Section 12. Ecological information

No ecotoxicity data on the mixture. Concentrated surfactants can be harmful to aquatic life; avoid releasing undiluted product to the environment. Normal use with discharge to a sewer and wastewater treatment is the intended route.

Section 13. Disposal considerations

Dispose of unused product and contaminated absorbents according to local, state and federal regulations. Rinse empty pails with water before recycling or disposal; do not reuse pails for food or drinking water.

Section 14. Transport information

DOT (US): not regulated as a hazardous material. IMDG / IATA: not regulated. Not a marine pollutant. Basis: aqueous, not flammable, not corrosive (pH 6.5–8.5).

Section 15. Regulatory information

TSCA	All ingredients with a CAS number are on the TSCA Inventory, active (EPA SRS, October 9, 2026).
FHSA (CPSC)	Consumer label under the Federal Hazardous Substances Act: signal word, eye hazard, first aid and KEEP OUT OF REACH OF CHILDREN.
SARA 311/312	Serious eye damage or eye irritation.
SARA 313	Formaldehyde is a listed toxic chemical; at about 0.04 % it is below the 0.1 % de minimis and not reportable.
California Prop 65	WARNING: This product can expose you to formaldehyde, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.
California SB 258	Full ingredient disclosure at baja.supply/ingredients. Contains fragrance allergen(s).
FIFRA	Not a pesticide; no antimicrobial claims.

Section 16. Other information

Prepared by Baja Supply for Baranta International Trade Solutions LLC from the manufacturer's declared composition and technical sheets. Revision 1.3, November 4, 2026, supersedes Revision 1.2 (October 13, 2026).

Revision history

- Rev 1.3 (2026-11-04): address; varieties on sale; classification unchanged (Category 1).
- Rev 1.2 (2026-10-13): Section 1 names the US importer as the responsible party; Section 3 shows the fragrance as a proprietary mixture. Classification and composition unchanged from Rev 1.1.
- Rev 1.1 (2026-10-11): Section 2 classified as serious eye damage, Category 1 (Danger), conservatively from the composition; Section 3 adds the preservatives that may be present from raw materials.

The information is believed accurate but is not a warranty; users must determine suitability for their own purposes.
